Plate from Cyprus with depiction of a warp-weighted loom, ca. 850-750 BCE,
Antikensammlungen der Universität Bonn

Pattern making: computation's hidden histories

[Jacquard-card Making.]

Lisa Nakamura: Indigenous circuits

"from 1965-1975 the Fairchild Corporation's Semiconductor Division operated a large integrated circuit manufacturing plant in Shiprock, New Mexico, on a Navajo reservation.

During this time the corporation was the largest private employer of Indian workers in the U.S. The circuits that the almost entirely female Navajo workers produced were used in devices such as calculators, missile guidance systems, and other early computing devices."

"Weaving, like all Navajo arts, is done with unique imagination and craftsmanship, and it has been done that way for centuries....[for] "building electronic devices, transistors and integrated circuits, also requires this same personal commitment to perfection." - Fairchild catalogue

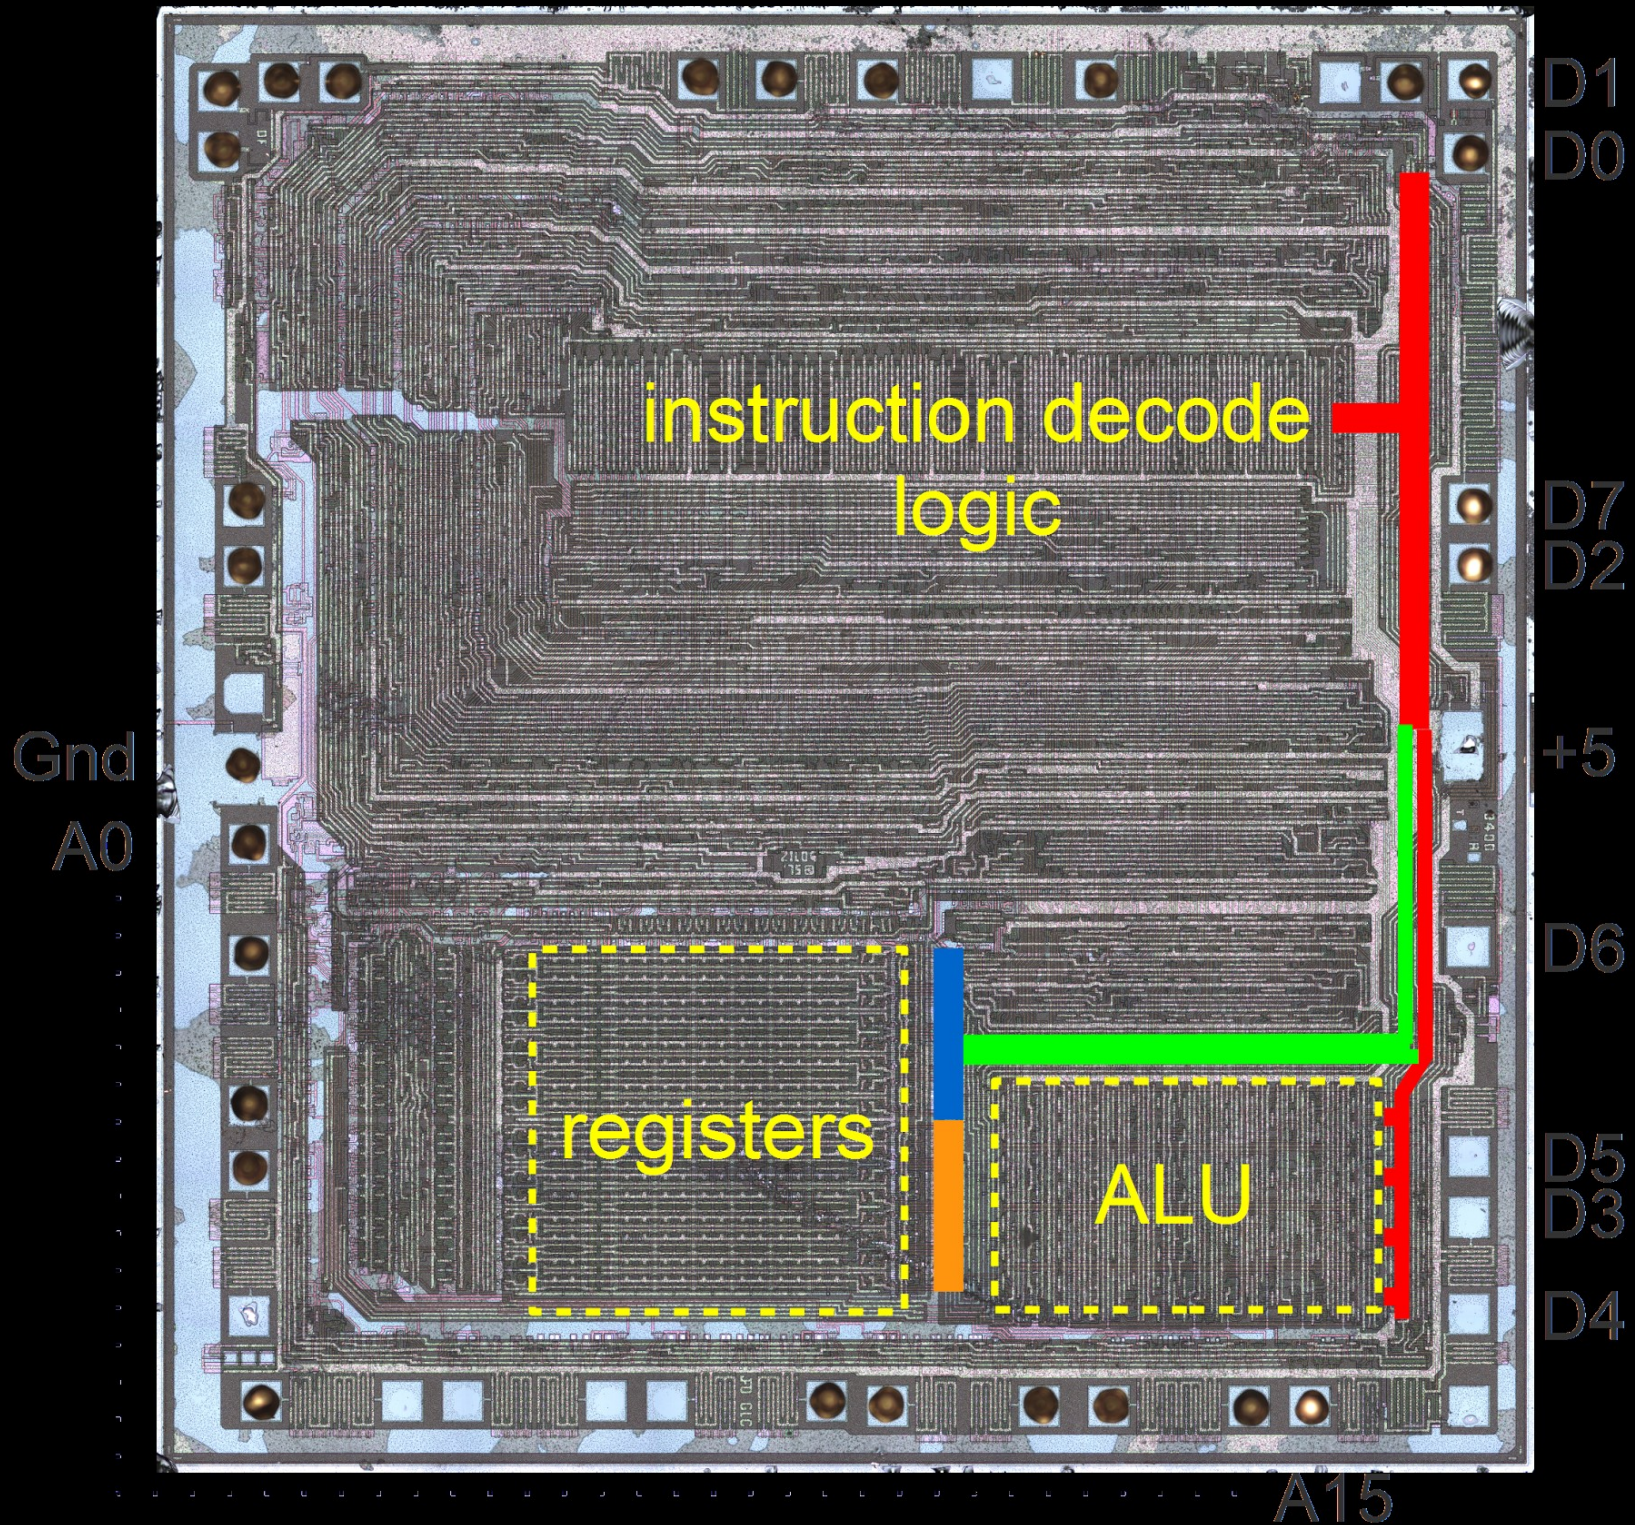

7 instructions for arithmetic (add, sub, inc, dec, compare)

vs

13 instructions for shifting/rotating data

is weaving a form of computation?

Kombir 6
Fig. 4-10

Decoding Inca Quipu with sound

Largest empire ever seen in the Americas and the largest in the world at that time.

Moray: An agricultural Laboratory

By using their knowledge of the sun, wind, altitude, and irrigation, each step, about 3m/10ft tall, represents a temperature change of about 0.5 degrees Celcius/1 degree Fahrenheit.

They conceived the world as composed of three aspects. In their representation of the cosmos, for example they used the three words:

UKU PACHA (the past and the interior world),
 KAY PACHA (the world of present and of here),
 HANAN PACHA (the future and the supra world).

These worlds are represented as concentric circles. Each of these worlds are inhabited by spiritual beings. Once future, present and past are not conceived as a linear structure, human beings can access the three dimensions.

For the Aymara people living in the Andes, the past lies ahead and the future lies behind.

Sonification parameters

colour

branching level

pendant length

pendant attach (verso or recto)

pendant ply (S or Z)

unknown values

sine tone spectrum of three partials

duration between sound grains (inter onset duration)

duration of each sound grain (relative to inter onset time)

pan position left or right channel

envelope shape (audible as “inversion effect”)

are usually interpreted as neutral (pan) or low (colour)

a woven artefact is a representation
of it's own making

Ribbon 1

Hallstatt tablet weaving circa 800-400 BC

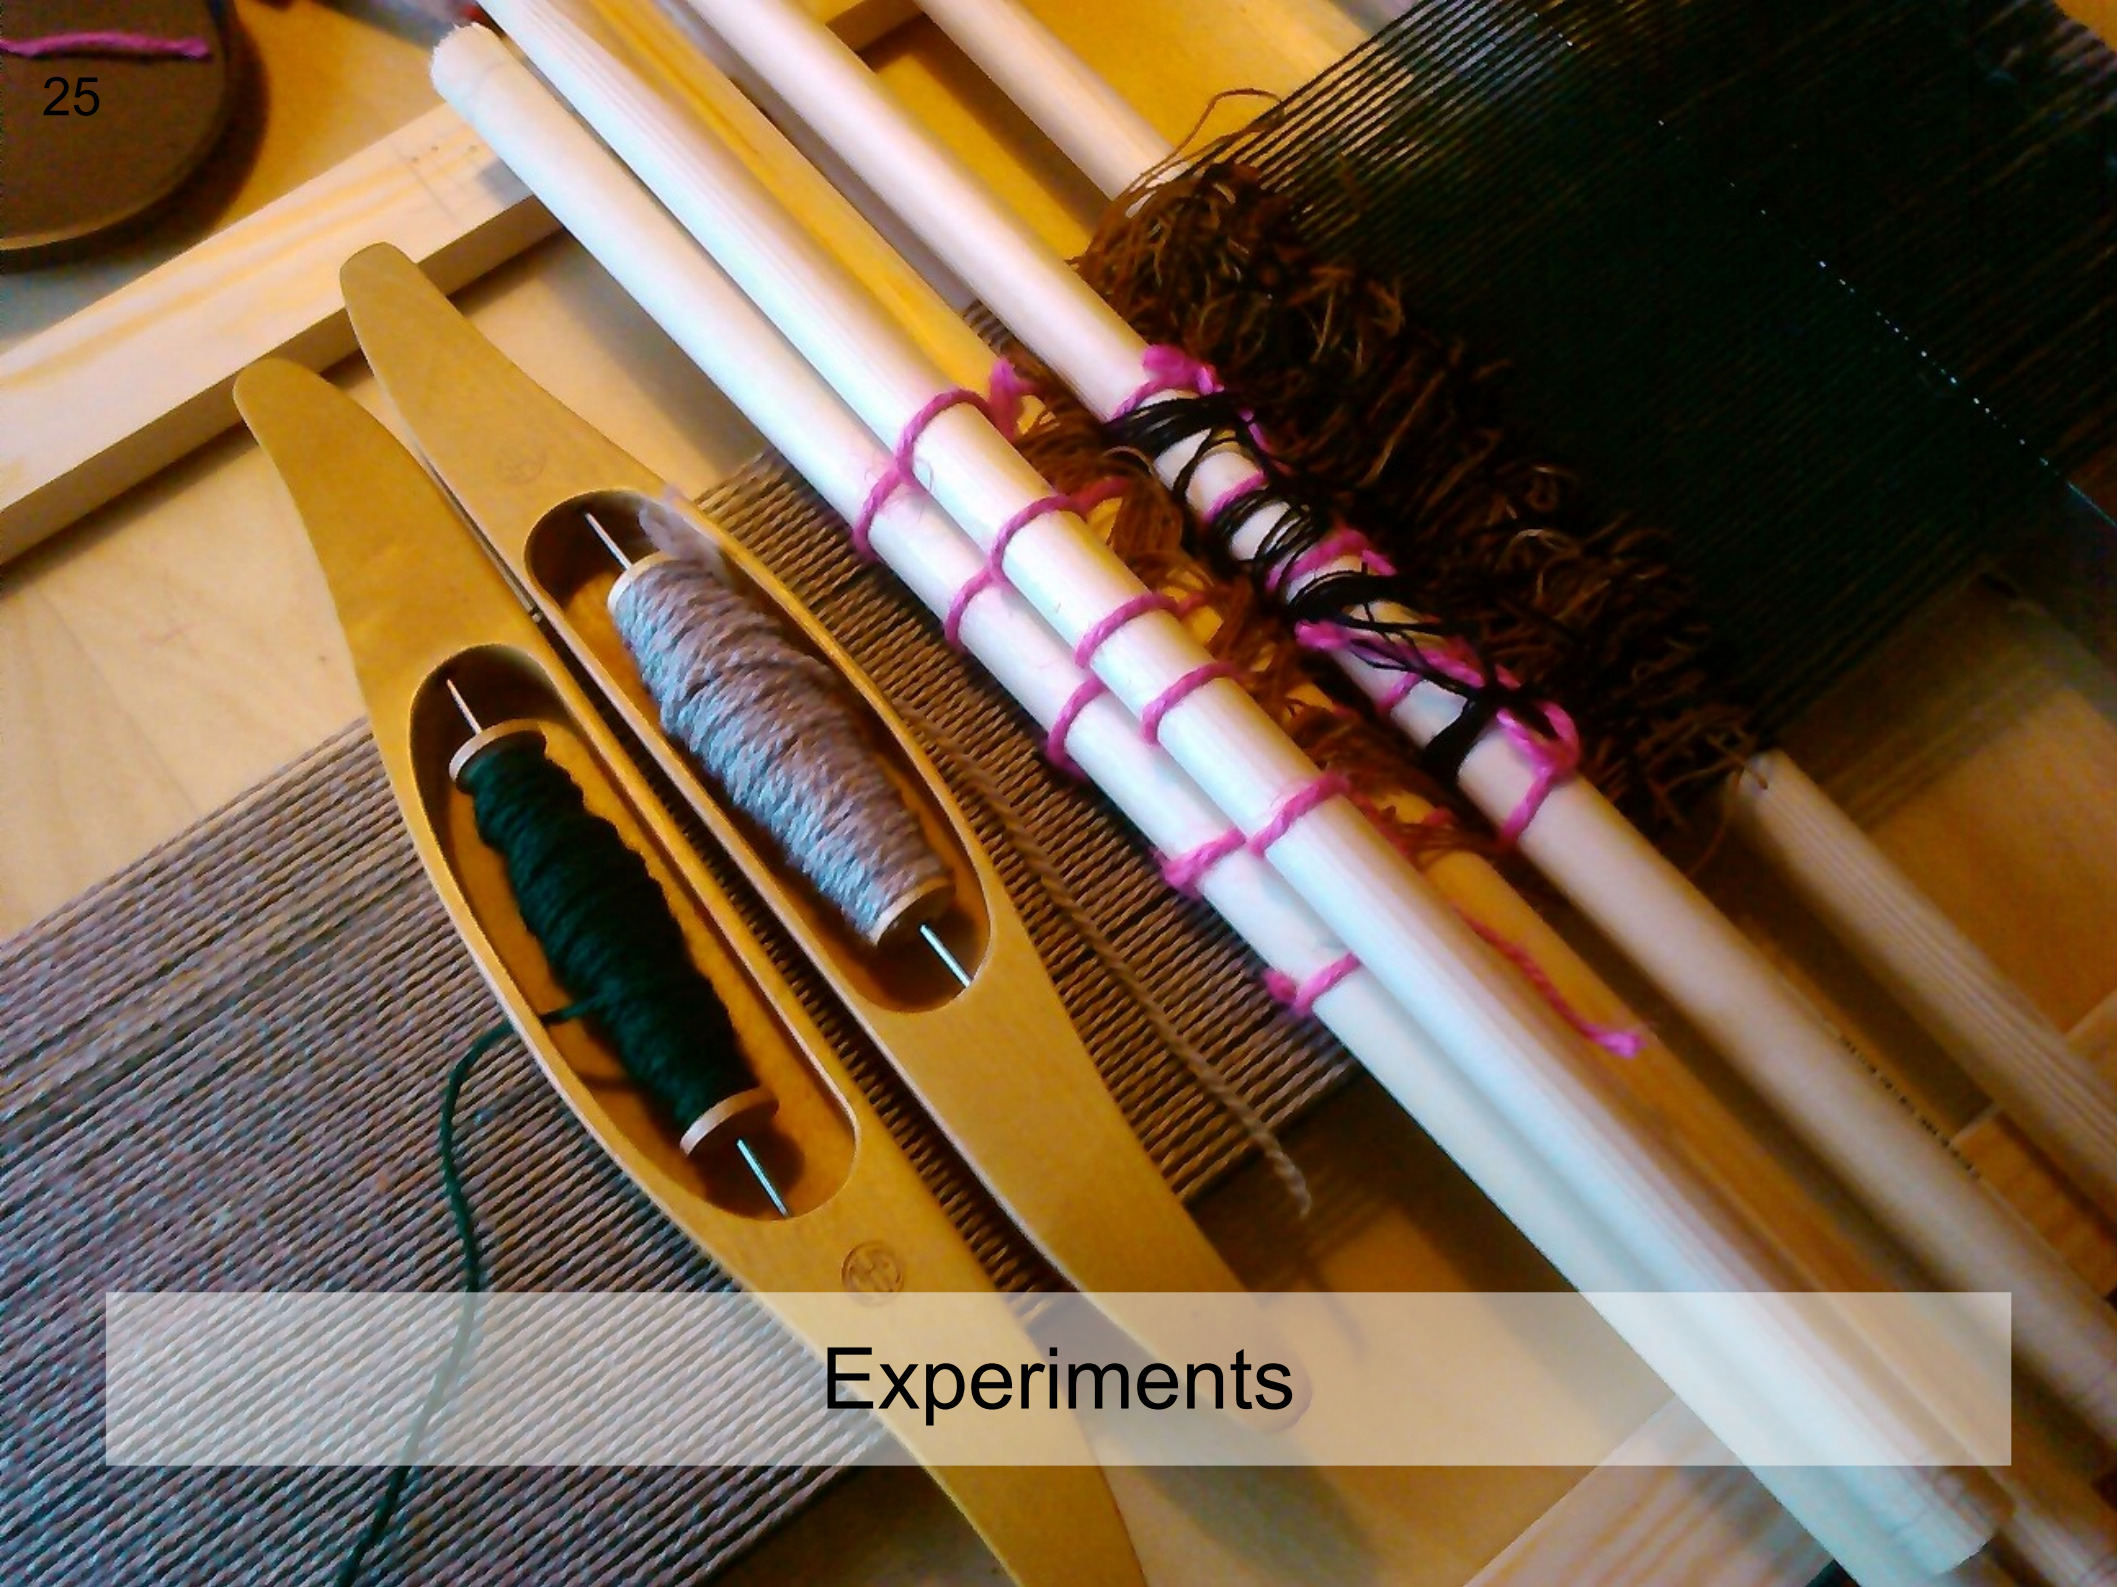

Hallstatt, ribbon No. 2 (reconstruction)

1

Ceramic vessel from Hoste, Slovakia for comparison with the pattern of ribbon No. 2 from Hallstatt. Both Hallstatt-Period (1: © K. Grömer. – 2: based on Griebel 1997)

Experiments

1. Start by modelling a 4 shaft frame loom

Heddles and lift plan → Structure → Pattern

2. Building & warping a real one

3. Testing the model/hypothesis

Tablet loom

1. Start by learning to weave with tablets

30

A

B

C

2. Build model (and a language) from observation

```
(define (card-flip c)
  (list
    (flip (card-angle c))
    (card-b c) (card-a c)
    (card-c c) (card-d c)
    (card-memory c)
    (card-previous-memory c)))

;;      loom setup
;;  warp          weave
;;
;;  /----|o o|---####\
;;  \----|o o|---####/
;;      ---

;; weaving (this took a while to figure out)
;;
;; turn   f   f   f   b   f   b   b
;; top->  a[b] d[a] c[d] [d]a c[d] [d]a [a]b
;; bot->  [d]c [c]b [b]a c[b][b]a c[b] d[c]

(define (card-weave c)
  (if (equal? (card-memory c) "f")
      (list (card-b c) (card-d c)
            (list (card-a c) (card-c c))))

(define (card-loom cards) (list cards))
(define (card-loom-cards c) (list-ref c 0))

(define (card-loom-all-forward c)
  (card-loom
   (map
    (lambda (card)
      (card-forward card)
      (card-loom-cards c)))))

(define (card-loom-all-back c)
  (card-loom
   (map
    (lambda (card)
```

3. Testing the language/model hypothesis

Language

```
(weave-forward 1)  
(twist 0 2 4 6)  
(repeat 4  
  (twist 3)  
  (weave-forward 4)  
  (twist 5)  
  (weave-back 4))
```
